QUALITY MANAGEMENT MANUAL

Date: 1 November 2017 Version:2, Review 1

Conducted by Quality Manager

Approved by General Manager

QUALITY POLICY

The aim of the Company is the provision of services to its customers, which will satisfy continuously their needs and expectations. These services according to customers' needs and expectations are:

- Steel and pipe works for ships and industrial installations.
- Installation of machinery equipment on ships (ballast water treatment systems, steering gear systems).
- Repairs of lifting equipment for ships and industrial installations.
- Metal constructions for port and industrial installations.
- Installation of ships' deck equipment.
- Installation of ships' deck machinery.

These services are in compliance with existing applicable national and international rules and regulations.

Quality of products and services are closely related to modern infrastructure and equipment and highly experienced and trained personnel together with the continuous effort for upgrading and improvement.

The achievement of this aim constitutes the means for maintaining the Company as a reliable and competitive business unit in the sector and also for the continuous improvement and growth. This is achieved with the operation of a Quality Management System according to ISO 9001:2015.

The Quality Management System, its processes and the objectives, emanating from it are subject to continuous review so that to ensure permanent effectiveness, improvement and adaptation of same and also of all activities comprising the Quality Management System to customers' and generally business sector requirements. The analysis of the activities of control and review and also of the information, received from customers and other external sources and interested parties constitute a valuable source of inputs to the Quality Management System in the effort for continuous improvement.

The Management and the personnel of the Company are committed to this Policy and follow unconditionally the requirements of the Quality Management System. The Policy itself is subject to continuous review in order to ensure its applicability regarding the System's requirements and the inclusion of all processes, which comprise the System.

The Quality Policy is available to interested parties upon their request.

Nikos Tzoumas / General Manager
